

## Phonogram Word Cards

The following lesson sets use this resource:

- Introducing Phonograms
- Reviewing Phonograms
- Reading Words with Phonograms
- Practice Games

This document contains the Phonogram Word Cards to use with the Reading Words with Phonograms Routine in the Foundational Reading Lesson Set. A list of these words in a smaller font is contained in the Phonogram Word List. The cards are organized according to their frequencies on the Phonogram Word List. The word list begins with the most frequent phonograms, so these cards can be taught in order from the first set to the last.

These phonogram word cards are designed to be used in combination with the Lesson Guides for the Foundational Reading Lesson Set. Within each phonogram's list, the words on the cards are organized first by whether the phonogram occurs at the end of the word. This list only contains 1 syllable words because of the number of words and resulting length of the list. Additional words with 2-3 syllables are included on the Phonogram Word List. The words in each group are ordered by the number of phonemes they contain.

The word cards can be used for lessons as is, or you can use them to create your own lists of words. These words were selected based on a sound-spelling frequency analysis by Devin Kearns (devin.kearns@gmail.com). The Lesson Guides were designed by Marcia Ferreira and Devin Kearns.
